

Please review the guidelines listed here and discuss with each person in your match. Each match must decide together when it is appropriate for their match to resume in-person contact - the timing will vary for our matches based on their needs and considerations.

When deciding if you should have in-person contact, first acknowledge the following:

- Relationships can continue to grow and be meaningful in the absence of in-person contact. We also know that in-person contact is important for connection, mental health, and overall well-being. Whether virtual or in person, remember that consistent contact is important.

- ***Please check on your Little weekly.*** This could be as simple as sending a meme, emoji, or postcard. Let them know you are thinking of them and keep sending encouragement and a way to make them smile.

- Any in person contact carries a risk for COVID-19 transmission. A person with no symptoms can be a carrier and infect others. Please follow recommendations from the Centers for Disease Control & Prevention (CDC) to help lower risk of transmission. Check back frequently as information and recommendations continue to be revised.

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/prevention.html>

Stay up to date on our state requirements regarding COVID-19 as well.

- Deciding whether or not to have in-person contact will be an ongoing personal decision that will change repeatedly depending on updates within the pandemic, contacts with other people, personal wellness or symptoms day by day. ***This is a decision that will need to be assessed each time when planning an outing.***

- Each person needs to make a thoughtful choice about what is the best decision for themselves and their own health. ***Members of the match need to respect each other's needs and put safety first.*** Consider ripple effects – who have you been exposed to recently? Will either of you be near someone who is immunocompromised or at heightened risk? If so, consider what is best for their health too.

- ***Do not pressure each other into having in person contact. Be careful and sensitive in assessing if anyone feels anxious or concerned about safety and wellness. If you need some support around how to have this conversation, contact your Match Support Specialist (MSS).***

- Part of being a Big is to be a role model. This includes modeling healthy behavior, responsible decision making, self-care, and being a rule-abiding and conscientious community member. It

also means modeling ways to cope with frustrating and stressful situations – talking about feelings, finding healthy self-care activities, being open about good days as well as bad days.

- The agency will continue to monitor and follow advice of the CDC and state guidance. Agency may choose to revise or revoke guidelines around in-person contact as needed.

Protocols for In-Person Contact:

1. Each person in the match needs to assess their health directly before each outing: Are you feeling achy? Fever or chills? Fatigued? Cough or tightness in chest? Unusual digestive issues? Unknown rash? Before each outing, all parties should do this self-evaluation and discuss with each other to determine if outing should occur or be a virtual visit instead.
2. Share with your match if you have been exposed to someone with COVID-19 or had exposure to a large amount of people – consider your recent contacts. We need to be open and honest with each other so we can protect each other and work together to make the best informed decision about an outing.
3. When you get together, remind each other about rules for the day. How will we help keep each other healthy? There are many logistics to think through. Make a plan and discuss your plan. Check in throughout your outing.
4. Wear a mask during outings: **THIS IS MANDATORY FOR BOTH BIG AND LITTLE.** Refer to the Center for Disease Control & Prevention for further details about mask best practice. <https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/diy-cloth-face-coverings.html>
5. Big is responsible for supplying a clean mask (reusable or disposable) for self and Little for each outing. The Little is also encourage to have their own mask (*if they are able to do so*) for each and every activity that they have with their Big. Reusable masks will be collected by the big at the end of each outing to launder (follow CDC guidelines for safe handling and washing), disposable masks will be discarded by the little once inside their home. Big must also supply hand sanitizer and anything else needed for hand hygiene or protection (as listed below).
6. Wash or sanitize hands frequently – remind each other during the outing.
7. Maintain at least 6 feet of distance when possible.
8. Riding in the car together can be a challenge with social distancing. You may choose to avoid it all together. If transporting child, use the following:

COVID-19 MATCH CONTACT GUIDELINES

- Big and youth wear mask.
- Consider having windows down or keeping ride short.
- Youth should sit in backseat.
- Hand hygiene: Use hand sanitizer directly before car ride and directly after to help reduce germs in car.
- Big should wipe down car before, during and after outing.
- If it seems best to avoid transporting Little, Big should consider outings in the child's neighborhood: walk, bike ride, bringing ball, sidewalk chalk, or game to use in yard or nearby park.

9. Outdoor activities are best, see activity list below. Consider time of day – morning activities will help beat the heat and the crowds. Consider bathroom needs – where is there access to a restroom? Facilities are locked at some parks, but not all. Consider where you can find shade. Bring plenty of water for hydration. Bring and use sunscreen and insect repellent.

Supplies for each outing:

- Masks for Big and Little
- Hand sanitizer
- Sanitation wipes
- Hand soap
- Sunscreen
- Insect repellent
- Individually wrapped snacks
- Outdoor fold-up chairs or blanket
- Water (for drinking and hand-washing)
